

20m LMP Super Seaming Tape

£22.95

Product Images

Description

Can be used with [Aquabond Adhesive](#) however for joins longer than 20m it is far more economical to use our [Multipurpose Adhesive](#).

To be installed green side down!

Adhesive to be added to the white surface of tape. Yes we know this sounds mad.. but this is what the manufacturer states in there installation guide!

- **White geo textile/green film laminate**

- Non-woven polyester geo textile
- Modified Polyolefin film
- Length: 20m
- Width: 20cm
- Weight: 145g/m2
- Tensile Strength: 800N/10cm
- Used for the current wide range of artificial grass carpets seam joints.
- Impervious to moisture ingress from the base.
- Strong rot proof geo-textile bonding medium.
- Lays flat to substrate when rolled out.
- Sealed back to prevent adhesive penetrating to base.
