Description

High Strength Sports Tape: Pre-layered with 5 beads of extra strength adhesive. Easy-peel release liner to allow for clean and fast jointing of artificial grass rolls. 20cm width tape supplied in roll lengths of 20m.

How to Use:

1. Ensure the tape is warmed up (at least 10 degrees or above) for 24hrs before use.
2. Line up the tape under your artificial grass joints, white side down, adhesive facing up BEFORE

removing the clear release liner.

3. Once you are satisfied with the position along the entire join length, peel back the release liner through the joint in the artificial grass.
4. Press the backing of the grass firmly into the adhesive as the liner is removed.
5. Allow 24hrs for the adhesive to cure.
